## EXPERIENCE

---

### Web Developer -Intern

Annopett

- Built a role-based CRM dashboard platform in React with dedicated Admin, Client, and Employee panels.
- Designed and implemented interactive data visualizations for real-time KPIs, analytics, and project tracking to improve decision-making.
- Delivered a fully responsive application with modern UI themes, task management features, and collaboration tools.

### Frontend Developer

Hoop

- Applied modern UI/UX principles such as parallax scrolling and responsive layouts to deliver engaging user experiences.
- Acquired practical expertise in component-based architecture, state management, and converting design mockups into fully functional web applications.
- Developed the frontend of BookHive, an online bookstore with categorized collections, and GreenWave Energy, a corporate website for a solar and wind power company, using React.

## EDUCATION

---

**Bachelores in Computer Science**, University of Engineering and Technology (GPA: 3.26)

Oct '21 — Jul '25  
Peshawar, Pakistan

**FSC in Pre-Engineering**, Concordia College

Apr '20 — May '21  
Nowshera, Pakistan

**SSC**, Army Public School (Zamzama)

Apr '18 — Mar '19  
Nowshera, Pakistan

## CERTIFICATIONS

---

**Frontend Developer (React)**, HackerRank

**Python (Basic)**, HackerRank

**Frontend Development Libraries**, freecodecamp

**JavaScript RAG Web Apps**, deepLearning

**Responsive Web Design**, freecodecamp

## PROJECTS

---

### CRM Dashboard (Frontend)

- A responsive and interactive frontend for a CRM dashboard platform, designed to manage customer relationships, track sales, and visualize business analytics. Built with **React and Tailwind CSS**, featuring **dynamic charts, tables**, and intuitive UI components for seamless user experience and client data management

### HealBot-AI driven personalised virtual therapist (FYP)

- A terminal-based chatbot that provides therapeutic support for insomnia and OCD using AI-powered responses and knowledge retrieval. Built with Python 3.8+, **OpenAI GPT-3.5-turbo, ChromaDB, and React + Tailwind CSS** for interface styling. Supports document processing (PDF, DOCX, TXT) and features emergency detection, therapeutic guidance, and secure API key management

### AI-FashionBot

- A Flask-based AI chatbot that acts as a Virtual Fashion Designer, delivering personalized outfit ideas, style suggestions, and shopping tips through fashion data analysis. Built with **Flask, LangChain, OpenAI GPT-4o-mini, MongoDB, Tailwind CSS**, and Pandas/Openpyxl for XLS/CSV processing

### Management Information System

- Designed and developed an intuitive interface for streamlined student and staff management, integrating automated reporting and analytics for attendance tracking and grade management to improve administrative efficiency and enable data-driven decision-making.

## SKILLS

---

**Programming Languages** Python, JavaScript (ES6+), HTML5, TypeScript, C++

**Frameworks/Libraries** React, Nodejs, Nextjs, Tailwind CSS, Redux

**Tools** Git, Vs Code, Postman, ClickUp, Figma, Canva

**Databases** SQL, MySQL, MongoDB, Firebase, Supabase

**UI/UX & Design** UI/UX Design, Responsive Design
